

Software Developer / Backend Developer Intern – Job Description

Job Title: Software Developer Intern / Backend Developer Intern

Location: India

Type: Internship / Full-time Internship

About the Role

We are looking for a motivated Software Developer Intern with strong problem-solving skills and a solid foundation in backend development, databases, and full-stack application development. The candidate will work on building scalable web applications, APIs, and data-driven features while collaborating with cross-functional teams.

Key Responsibilities

- Design, develop, and maintain backend services and REST APIs.
- Work with databases to store, retrieve, and manage application data efficiently.
- Build and enhance web applications using modern frontend and backend technologies.
- Write clean, reusable, and maintainable code.
- Debug issues, optimize application performance, and improve reliability.
- Participate in code reviews and collaborate with team members on software design.
- Work on integrating AI-powered or data-driven features into applications where required.

Required Skills

- Strong knowledge of **Java or Python**
- Good understanding of **Data Structures and Algorithms**
- Knowledge of **OOPs, DBMS, Operating Systems, and Computer Networks**
- Experience with **SQL** and relational databases
- Familiarity with **REST APIs** and backend development
- Knowledge of **Git/GitHub** for version control
- Problem-solving ability and debugging skills

Preferred Skills

- Experience with **Spring Boot, Hibernate, or JPA**
- Experience with **React.js, Node.js**, or full-stack development
- Familiarity with **MongoDB** or NoSQL databases
- Exposure to **FastAPI** or Python backend development
- Knowledge of **Docker, CI/CD**, or cloud platforms

- Understanding of **Machine Learning / NLP / GenAI concepts**
- Familiarity with **RAG, embeddings, vector databases, or LangChain** is a plus

Preferred Candidate Profile

- Pursuing or recently completed a degree in **Computer Science / Information Technology / related field**
- Hands-on project experience in backend, full-stack, or AI-based applications
- Ability to quickly learn new technologies and work in a team environment
- Good communication skills and strong ownership mindset

Nice to Have

- Built projects using **FastAPI, React, Spring Boot, or machine learning**
- Experience with **resume screening, chatbot, recommendation system, or analytics projects**
- Knowledge of **FAISS, LangChain**, or document-based retrieval systems
