PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of experience developing scalable backend applications using Java, Spring Boot, Microservices, REST APIs, Docker, Kubernetes, and Cassandra. Experienced in API development, database optimization, distributed systems, production support, and Agile software delivery. Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Computer Networks with 600+ coding problems solved.

EXPERIENCE

Thales

Software Engineer 1

January 2025 – Present

Noida, Uttar Pradesh

- Developed and maintained **10+ RESTful APIs** using **Java, Spring Boot, and Microservices Architecture**, improving API response time by **30%** through code and query optimization.
- Containerized backend services using **Docker** and deployed 5+ services on **Kubernetes**, reducing deployment effort and improving scalability across environments.
- Enhanced **Cassandra** data models and database queries, improving data retrieval performance by **25%** and reducing response latency.
- Integrated **Hibernate/JPA** for data persistence and utilized **JUnit5** and **Mockito** for automated testing, improving code quality and application maintainability.
- Participated in sprint planning, backlog grooming, estimation, code reviews, and production releases within **Agile/Scrum** teams.
- Investigated and resolved **20+ production issues** through debugging, log analysis, and root cause analysis, improving application stability and system reliability.

iOne IT Solutions

Software Developer Intern

May 2024 – July 2024

Noida, Uttar Pradesh

- Developed enterprise-grade web applications using Oracle APEX for workflow automation and business process management.
- Designed and implemented **10+ interactive dashboards and analytical reports** used by business stakeholders.
- Improved SQL query performance and database operations, reducing report generation time by 20%.
- Collaborated with business users to gather requirements and deliver scalable technical solutions.

EDUCATION

Jaypee Institute of Information Technology, Noida

B.Tech in Computer Science and Engineering

2021–2025

CGPA: 8.5

SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS

Frameworks and Libraries: Spring Boot, Hibernate, JPA, Quarkus, React, Node.js

Databases: SQL, MongoDB, Cassandra

Devops: Docker, Kubernetes, Jenkins, CI/CD

System Design: Microservices, Distributed Systems

Security: Nexus IQ, Fortify, SonarQube

Developer Tools: Git, GitLab, Jira, Maven, Gradle, Visual Studio, PyCharm, IntelliJ

Testing: JUnit5, Mockito, Postman

Core Concepts: OOPs, Data Structures and Algorithms, Multithreading, Operating Systems, Computer Networks, DBMS

PROJECTS

Real-Time Chat Application | *MERN Stack, Socket.IO*

- Built a real-time chat application using React.js, Node.js, MongoDB, Express.js, and Socket.IO supporting instant messaging and group communication.
- Designed and integrated JWT authentication, REST APIs, and database optimization for scalable message storage and retrieval.

Employee Management System | *Django, Python, SQL*

- Created an Employee Management System for managing records of 50+ employees with CRUD and filtering operations.
- Created responsive UI and optimized backend workflows for efficient data management.

Route Optimization and Travel Planning System | *C++, Dijkstra's Algorithm*

- Built a travel planner using Dijkstra's Algorithm to determine shortest and cost-efficient routes between cities.
- Implemented route optimization and cost analysis features, enhancing travel decision-making and planning accuracy.

ACHIEVEMENTS AND RECOGNITION

- Microsoft Azure AI Fundamentals Certified
- Solved **600+ Data Structures and Algorithms problems** across LeetCode and GeeksforGeeks.
- 5-Star** Coder on **HackerRank**.
- Technical Volunteer, **IIIT Student Optica Chapter**
